cycles per instruction [1]: KVM: h2 (uncontrolled) and indexes (controlled), "neutral" pinning

controlled throughput [1]: KVM: h2 (uncontrolled) and indexes (controlled), "best" pinning

controlled throughput [1]: KVM: h2 (uncontrolled) and indexes (controlled), "worst" pinning

power consumption [W]: KVM: h2 (uncontrolled) and indexes (controlled), "neutral" pinning

power consumption [W]: KVM: h2 (uncontrolled) and indexes (controlled), "best" pinning

power consumption [W]: KVM: h2 (uncontrolled) and indexes (controlled), "worst" pinning
cycles per instruction [KVM]: scales (uncontrolled) and kernels (controlled), "neutral" pinning

uncontrolled throughput [KVM]: scales (uncontrolled) and kernels (controlled), "neutral" pinning

cycles per instruction [KVM]: scales (uncontrolled) and kernels (controlled), "very" pinning

uncontrolled throughput [KVM]: scales (uncontrolled) and kernels (controlled), "very" pinning

cycles per instruction [KVM]: scales (uncontrolled) and kernels (controlled), "neutral" pinning

uncontrolled throughput [KVM]: scales (uncontrolled) and kernels (controlled), "neutral" pinning

cycles per instruction [KVM]: scales (uncontrolled) and kernels (controlled), "neutral" pinning

uncontrolled throughput [KVM]: scales (uncontrolled) and kernels (controlled), "neutral" pinning

power consumption [KVM]: scales (uncontrolled) and kernels (controlled), "neutral" pinning

power consumption [KVM]: scales (uncontrolled) and kernels (controlled), "neutral" pinning

power consumption [KVM]: scales (uncontrolled) and kernels (controlled), "neutral" pinning

power consumption [KVM]: scales (uncontrolled) and kernels (controlled), "very" pinning
cycles per instruction [1]: KVM: speeds (uncontrolled) and indexes (controlled), “neutral” pinning

cycles per instruction [1]: KVM: speeds (uncontrolled) and indexes (controlled), “best” pinning

cycles per instruction [1]: KVM: speeds (uncontrolled) and indexes (controlled), “worse” pinning

power consumption [W]: KVM: speeds (uncontrolled) and indexes (controlled), “neutral” pinning

power consumption [W]: KVM: speeds (uncontrolled) and indexes (controlled), “best” pinning

power consumption [W]: KVM: speeds (uncontrolled) and indexes (controlled), “worse” pinning
