cycles per instruction [1]: KVM - avrora (uncontrolled) and scales (controlled), "neutral" pinning

power consumption [kHz]: KVM - avrora (uncontrolled) and scales (controlled), "neutral" pinning

cycles per instruction [1]: KVM - avrora (uncontrolled) and scales (controlled), "fast" pinning

power consumption [kHz]: KVM - avrora (uncontrolled) and scales (controlled), "fast" pinning
cycles per instruction [1]: KVM - scales (uncontrolled) and avrora (controlled), "neutral" pinning

power consumption [8]: KVM - scales (uncontrolled) and avrora (controlled), "neutral" pinning
cycles per instruction [1] : KVM : scalac (uncontrolled) and hl (controlled), "neutral" pinning

power consumption [5] : KVM : scalac (uncontrolled) and hl (controlled), "neutral" pinning
cycles per instruction: KVM: scalac (uncontrolled) and tambis (controlled), "neutral" pinning

power consumption: KVM: scalac (uncontrolled) and tambis (controlled), "neutral" pinning
cycles per instruction [1] : KVM : scalac (uncontrolled) and scalac (controlled), "neutral" pinning

cycles per instruction [1] : KVM : scalac (uncontrolled) and scalac (controlled), "worse" pinning

power consumption [W] : KVM : scalac (uncontrolled) and scalac (controlled), "neutral" pinning

power consumption [W] : KVM : scalac (uncontrolled) and scalac (controlled), "worse" pinning
