API Blueprint

# Polls

Polls is a simple API allowing consumers to view polls and vote in them.

## Questions Collection [/questions]

### List All Questions [GET]

+ Response 200 (application/json)

```json
{
    "question": "Favourite programming language?",
    "choices": [
        {
            "choice": "Swift",
            "votes": 2048
        },
        {
            "choice": "Python",
            "votes": 1024
        }
    ]
}
```
Summary

1. Quick API building 30 min’s
2. Can be changed in minutes
3. Flexible and Collaborating API design
4. Generated documentation
5. Integrated code samples
6. Debugging and Automated Testing
7. Github Integratoin
