List of Citations

Jan Kofroň

February 18, 2019

The list is based on information from common publication databases. The list contains citations from monographs, scientific periodicals, reviewed proceedings, doctoral and habilitation theses, and technical reports (excluding those of author's faculty), excluding self citations where there is a non-empty intersection between the particular lists of authors and excluding all publications of the author's department (D3S). Total number of citation is 101; 72 are citations in conference proceedings and international journals (above the horizontal line at each publication if there is any), 29 are citations in theses and reports (below the horizontal line). The h-index according to this list of citations is 7.

According to the Scopus database, there are 69 citations excluding self-citations, as documented by the attached Scopus report. The Scopus h-index is 6.
