

List of Citations

Tomáš Bureš

October 2018

The list is based on information from common publication databases. Following the Charles University rector directives 9/2014 and 17/2014, the list contains citations from monographs, scientific periodicals and reviewed proceedings, excluding self citations where the applicant is among the authors of the citing publication. Also excluded are publications originating wholly from the applicant department, foreign language publications (because this makes determining the nature of the citation difficult) and theses (because it is not clear whether theses qualify as monographs).

The H-index computed based on this list of citations (which excludes self-citations and sole citations by others from the applicant's department) is 9. When taking into account only cited works belonging to categories A-C, the H-index is 8.

1 Chapters in scientific monographs

A. Musil, J. Musil, D. Weyns, T. Bures, H. Muccini, and M. Sharaf: “**Patterns for Self-Adaptation in Cyber-Physical Systems**”. In *Multi-Disciplinary Engineering for Cyber-Physical Production Systems: Data Models and Software Solutions for Handling Complex Engineering Projects*. Springer, 2017, pp. 331–368. DOI: [10.1007/978-3-319-56345-9_13](https://doi.org/10.1007/978-3-319-56345-9_13)
